

Dear Student,

Thank you for your interest in the Parashakti Apprentice Program. Some of you are choosing this path for self-growth and discovery while others may have an interest in teaching Dance of Liberation, whatever your particular intentions are, these are grand visions in creation.

My program is an experiential, hands-on and in depth study of earth based medicine. Designed to train you to serve the community through ancient and modern healing modalities, the program is separated into three modules, each one acting as a pre-requisite to the next. Through one on one SoulHealing sessions, group classes, journal writing and service assignments, you will experience traditional shamanic rituals and ceremonies in an intimate setting with myself, my beloved Elders and other renowned wisdom teachers.

Upon graduation, you become eligible to join The Liberation Association, a professional organization that provides continuing education, marketing assistance and overall teacher support.

Enclosed in this packet you will find a detailed description and application of each module and its associated costs. Enrollment is ongoing.

Many Blessings,

Parashakti

'Healing is a personal, experiential process one undergoes to discover one's authentic self. While only the individual wishing to be healed can actually heal themselves, it has long been known that a skilled, sensitive and aware guide facilitates and helps to focus the journey while making it easier and more comfortable. Simply put, we often do not know where to even begin to heal ourselves until we are aware of the ills we've fallen victim to.'
